KV10/1H

Type H Industrial Vacuum Cleaner

The Kerstar KV10/1H Type H vacuum is purposely designed and built to meet the needs of users to safely and effectively pick up a wide range of hazardous dusts and debris. Constructed from 1.5mm thick steel, this heavy-duty vacuum is built for the toughest industrial environments, including construction, ensuring durability and resilience in demanding conditions. This model is equipped with three stages of filtration on the negative pressure (suction) side of the motor. The first stage is a sealable disposable microfibre bag, the second is a high-efficiency filter assembly using a filter medium that is specially designed as a pre-filter material for HEPA (High Efficiency Particulate Air) filters. The third stage is an oversized HEPA cartridge filter housed in a sturdy replaceable module. The KV10/1H is DOP tested on calibrated test equipment to achieve a filtration efficiency of greater than 99.995%. All Kerstar Type H vacuum cleaners are supplied with five disposable microfibre bags and a spare secondary high-efficiency filter assembly.

KV10/1H

FEATURES

- Thermal switch protection against overheating
- Four castor chassis or tubular caddy for rough surfaces
- Supplied with 32mm hose and toolkit, disposable microfibre bags and spare secondary high efficiency filter assembly
- Antistatic hose entry and conductive toolkit to dissipate build up of nuisance static

TECHNICAL SPECIFICATION

DIMENSIONS (H x W x D)

500 x 360 x 360mm

WEIGHT

11kg

MOTOR

1000W Max
800W Mean

PERFORMANCE

Single Motor
Max Airflow 156 m³/Hr

CAPACITY

8.5L

CLEANING RANGE

27m / 88ft
